

### Start Cherishing Water from SMALL

To commend the education sector for their active participation in the “Cherish Water Campus” Integrated Education Programme for 2016/17 school year, the second award ceremony was held on 10th November last year at Yau Tong Community Hall. 33 School Sponsoring Bodies, 58 participating schools and more than 100 principals, teachers and students were presented with awards in the ceremony.

“Star Principal” expressed through his speech in encouraging students for keeping up their good work in cherishing water, contributing to attain a water-sustainable environment and in long term driving Hong Kong towards a “Water-smart City”. Also, Mrs. HONG CHAN Tsui Wah and Mrs. LI CHOW Yeuk Lan, the Deputy Secretary and Chief Services Officer respectively from Education Bureau, together with Dr. CHAN Hon Fai, the Chairman of Advisory Committee on Water Supplies, were invited as the officiating guests and presenters for the ceremony.

Excellent performances were featured in the ceremony. A juggling team from Po Leung Kuk Western Women’s Welfare Club Fung Lee Pui Yiu Primary School gave a breathtaking display of Diabolo and Dish Spinning, which caught the attention of the crowd. Featuring the screen debut of Water Save Dave and a group of kids from St James Catholic Kindergarten role-played as different animals and water droplets, the ceremony was also mingled with a lively stage play, introducing everyone the previously launched pilot project - “Cherish Water Campus” Kindergarten Education Programme, as well as further strengthening the message of water conservation. Leading audiences all busy in taking photos for the lovely kids in responses to their cute dancing and singing performance, what a hustle!

Awarded students were also invited randomly to participate in the “Cherish Water TV” game to showcase their understanding on water conservation. As expected, students were able to demonstrate various water-saving tips by using different props and body movement which earned audiences’ applause.

Theme of the ceremony is “Start Cherishing Water from SMALL”, which indicates not only water conservation should begin when ones are “SMALL”, but also from “SMALL” habits.

Advisory Committee on Water Supplies Water Conservation Working Group  
Chairman, Dr. MAN Chi Sum was also one of the award presenters.

Fellow “Cherish Water Elites” pledged to practice water conservation under the lead of the “Star Principal” and Education Bureau Chief Service Officer Mrs. LI CHOW Yeuk Lan.

Awardee of the “Excellent School Sponsoring Body Award” this year is “Yan Chai Hospital Board of Directors”. Its Chief Executive Officer Mr. LEUNG Wai Kwong, Jason shared their schools’ experience on water conservation

Words from the “Cherish  Principal

“Cherish  Principal” Director of WSD, Mr. C.L. WONG, JP

Hello teachers and students! I am the new principal of “Cherish Water Campus”, the “Cherish  Principal. In December 2017, I took up the post from my predecessor – “Star Principal”. I feel excited yet nervous in taking up the task. I feel excited because educating the next generation to cherish water resources is truly meaningful; while I feel nervous because promoting water conservation in schools is not a simple task which concerted efforts of schools, teaching staff, parents and students are all essential.

“Cherish Water Campus” has entered its third school year. With your support, now more than 240 primary schools have joined the programme, which is about 40% of the total number of primary schools in Hong Kong. I would like to take this opportunity to express my sincere gratitude to the participating schools and teachers in promoting “Cherish Water Campus”. From now on, I will continue to shoulder the responsibility in leading our young generations to develop the culture of water conservation. I am sure the seeds of water conservation sowed in school campus will grow sturdily in every sector of our society, and drive Hong Kong towards a “Water-smart City”.

## SMART TIPS FOR WATER CONSERVATION: THE "UNSEEN" WATER!

1

Oh it's freezing out there! Definitely I'm craving for a big feast!  
Excuse me, can I have a Steak N Fries? And...a burger please?

2

After an hour...

Awww...I'm so full and I can't eat anymore...  
Son, why are you leaving so much food unfinished? You should have known that many people in the world don't get enough food!  
Hey! Not only you're wasting food, but water too!

3

How so? I know it's wrong to waste food...but I didn't waste any water as I didn't even order a drink  
Sigh, you just couldn't "see" the water you wasted! Apart from the actual water we used, much more water is consumed in the manufacturing processes of food and products. This type of unseen water is called "Virtual water"!

4

Take the burger you ordered as an example, you can't see any water on the burger, right? But during the manufacturing process, from growing the lettuce, feeding the cattle, washing its shed, rinsing the ingredient and even cooking, a lot of water was consumed!

Oh right! Even for dish cleansing! So much water has been used!  
A mere burger will cost around 2,400 Litres of "Virtual water", which equals to 1,200 bottles of 2L soft drinks!

5

Oh My God... I used to call myself "Cherish Water Expert" but indeed I wasted so much water! I guess I should start eating less then...  
Instead you should choose food more wisely with lower virtual water consumption, such as vegetables and fruits. And more importantly, only order what you can finish, don't be a "Big Waster"!

6

Oh I got it now!  
Look at your tummy! It's good for you to have less fast food after all!

Haha, let me take-away the unfinished food for supper tonight!

Service Extension of Mongkok “Water Resources Education Centre”

The temporary Water Resources Education Centre (WREC) in Mongkok has been set up since 2012, receiving visitors from schools and non-governmental organisations by appointment. The temporary WREC aims to enhance knowledge of water resources and the importance of water conservation among pupils through exhibits, demonstrations and games.

With the completion of the new Water Resources Education Centre at Tin Shui Wai in 2019, the temporary WREC will complete its mission in second quarter of 2018. The floor area of the new WREC will be larger than the temporary WREC. With the expanded area, the new WREC will introduce new initiatives and in-depth materials covering various aspects and information of water resources.

In view of its popularity, Water Supplies Department will extend the service of the temporary WREC from April to early June 2018 before it is closed down. Feel free to apply your visit on WSD's website or contact our Centre Manager, Mr. Philip YEUNG (Tel: 3188 2941) directly.
