

Game-5 Distribution of Reservoirs in Hong Kong

Objective:

Currently, there are 17 reservoirs in use in Hong Kong, storing rainwater from water gathering grounds all over Hong Kong. This game displays 7 main reservoirs with introductions respectively. Through the matching game, students can learn about the names and facts about the reservoirs, and their distribution in Hong Kong.

* Reference materials *

Teacher may make use of the following material:

(1) P2: Topic 4 Exploring Reservoirs - Lesson plan and worksheets

(2) Teaching video: Topic 2 Milestones of Hong Kong Water Supply (KS1 & KS2)

How to play:

The teacher would at first introduce the fun facts about 7 reservoir using Image Cards, then students would have to match the Image Cards to their correct location from memory, with help of facts about the reservoirs on the poster.

Items:

Background Poster

Image Card
