

Game-12 Journey of Dongjiang Water

Objective:

About 70% to 80% of the fresh water in Hong Kong is supplied by Dongjiang water. In this game, the route of the transportation of Dongjiang water from its source (Jiangxi Province), through the Guangdong Province and into Hong Kong is demonstrated. This can increase the students' understanding of the importation process and the extensive usage of Dongjiang water across the Guangdong Province and the Pearl River Delta.
