

GAME-18 Studying Water Meter - Answer

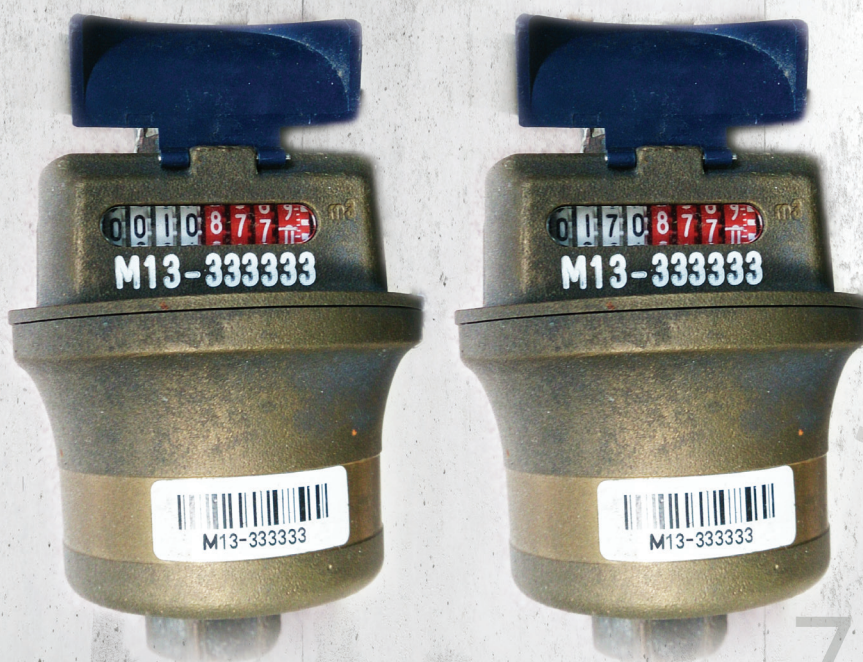

小小水錶大透視 STUDYING A WATER METER

Water Meter is a device for measuring water consumption. We can find out "Meter Number" and "Meter Reading" on a Water Meter. In every four months, Water Supplies Department will collect water charges from domestic households according to the reading of Water Meter. First 12 cubic meter of fresh water consumption is free of charge, and charges will be collected with respect to water consumption.

Below are two water meters with the same meter number but different readings. Can you arrange them in chronological order and identify which one requires water charges payment?

The digits **in white on red backgrounds** represent the decimal figures, whereas the digits **in black on a white background** represent numerals of digits in cubic meters.
