

There are some hidden water safety concerns in the building shown below, try to spot them all!

如何保持大廈食水優質？

HOW TO MAINTAIN GOOD DRINKING WATER QUALITY IN BUILDING?

Use standard pipe materials (Note4).
Check water mains regularly and fix immediately if any identified damage.

If a water purifier is installed, it must be maintained in accordance with the manufacturers' recommendation.

Fresh water tanks should be cleaned at least once every three months.

Employ a licensed plumber, authorized by Water Supplies Department (Note2), to check the fresh water supply system regularly.

Do you know where to find the directory of standard pipe materials?

Let's find out!

Let's find out!

In case of doubt, we can also appoint an accredited laboratory to take water samples and perform tests. Do you know where to find the list of accredited laboratory? (Note3)

For more information on the safety of drinking water in buildings, please refer to the WSD website: Quality Water Supply Scheme for Buildings - Fresh Water (Management System) (Note1).
